Here Are the Twelve Most Important Legal Natural Wild Duck Food for Fall Planting

GIANT WILD RICE

Mallards, Pintails, Blackducks, Teal, Widgeon and Canada Geese fly hundreds of miles to the Wild Rice Marshes.

A field of Wild Rice once established makes a permanent feeding ground.

Best places for planting wild rice are in sloughs, marshy lakes or ponds. In bays or coves on larger lakes, streams or rivers where it will be protected from waves. Wild rice grows the best in fresh waters from 6 inches to 3 feet deep where there is a mud bottom. Twenty-five pounds of seed plants one acre.

GIANT WILD RICE SEED

Delivered Price

\$1.40 per pound; 10 lbs. \$12.00;

25 lbs. (bushel) \$28.00

WAMPEE DUCK CORN

A GOOD DUCK COAXER

The seeds shell off the stalk in late Fall and will hold the Mallards and other marsh ducks after many other foods are gone.

Wampee seed may be planted this Fall in wet soils or very shallow waters. Ten pounds will plant an acre.

Delivered Price

\$1.50 per pound;

5 lbs. \$7.00

WILD CELERY

Canvasbacks, Redheads, Bluebills, Mallards and Blacks darken the sky over the wild celery beds. Wild celery is fully as important as wild rice as a duck food.

Wild Celery is an important food and cover plant for fish.

The Wild Celery is a hardy submerged plant which will grow in almost any fresh waters from 2 to 12 feet in depth. It grows well in slow running streams, lakes or ponds.

Seed of the wild celery should be planted during early Fall. Twenty-five pounds will plant an acre.

WILD CELERY SEED (until Nov. 15th)

Delivered Price

\$1.40 per pound; 10 lbs. \$12.00;

25 lbs. \$28.00

BURREED

A food plant for marsh ducks. The seeds are like kernels of corn and are eagerly eaten by mallards and other shoal water ducks.

Burreed grows on damp lowlands or in shallow waters from 1 inch to 1 foot in depth. Ten pounds of seed or 1000 roots will plant an acre.

Delivered Price

\$35.00 per 1000

roots;

500 @ \$18.00;

100 @ \$4.50

Seed \$1.25 per lb.;

5 lbs. \$6.00;

10 lbs. \$11.00

ORDER BLANK

FOR DRY OR MOIST SHORES AND BOTTOM LANDS

-----lbs. WILD (JAP) MILLET SEED, 10 lbs. @ \$4.00, 25 lbs. @ \$7.50, 100 lbs. @ \$26.00 \$-----
-----lbs. SMARTWEED SEED, per lb. @ \$.50, 25 lbs. @ \$11.00, 100 lbs. @ \$40.00.....

FOR SHALLOW WATERS, ONE FOOT OR LESS IN DEPTH OR REAL WET SOILS

-----lbs. BURREED SEED, @ \$1.25 per lb., 5 lbs. @ \$6.00, 10 lbs. @ \$11.00.....

TEAR OFF HERE

When Shooting at Wild Ducks Dropping to Decoys, Gun Must be Held Well Under.

Shooting on the wing is a mechanical art like billiard playing or boxing, and not difficult to master.

THE SECRET OF ATTRACTING THE WILD DUCKS IS NATURAL FOOD.

Wild Ducks are gluttons when it comes to eating and food is therefore their principal concern. Large numbers will congregate on a good feeding ground and remain as long as the food supply will last, or the season will permit.

During October and November are ideal for planting of these Natural Foods. Fall is Nature's planting season, it's the time that these Natural Wild Duck Foods reseed themselves and replenish their growth as they grow in their natural wild state. It's therefore an excellent time for planting. A fall planting will produce for the following years' duck season, and when once established, will be permanent.

GAME FOOD NURSERIES, P. O. Box 371, Oshkosh, Wis.

Select the kinds for your favorite shooting place and mail your order in now. We will send it forward on any particular date you wish or at which time we consider the best planting time in your locality. Complete instructions for planting will be furnished with acknowledgment of order.

PLANT SEVERAL KINDS

A variety of natural foods will entice more wild ducks and hold them for a longer visit. Wild Ducks like different kinds of foods. With several kinds growing, some will ripen early and others later, making food over the entire season.

IMPROVE THE FISHING

These Duck Food plants are also important to Game Fish. They support small animal life that is food for the fish, provide cover and protection from their natural enemies, thus enabling many more to grow to maturity. This plant life helps to clarify, purify and oxygenate the waters which is all important to the fish life. It means more fish, larger fish and more sport.

The inside pages describes the best kinds.

NODDING SMARTWEED

A favorite of the Marsh Ducks, they feed upon the seeds. It's very hardy and will thrive from the far north to the deep south. Smartweed will grow in either wet soils or shallow waters. Root sections can be planted NOW. 1,000 Roots will plant an acre. Smartweed Seed 25 lbs. an acre.

Delivered Price

\$31.00 per 1000 roots; 500 @ \$16.00;

100 @ \$4.00

Seed \$.50 per pound; 25 lbs. \$11.00;

100 lbs. \$40.00

WILD (JAP) MILLET

Called Wild Duck Millet or Goose Grass, ranks almost as high as Wild Rice as a Wild Duck Coaxer. It is fine for planting along banks or on wet soils, excellent for places dry in summer and flooded in duck season. Grows 2 to 4 feet high and produces a large seed head, abundance of food. Thirty pounds plants an acre.

Delivered Price

\$.40 per pound; 25 lbs. \$7.50; 50 lbs. \$14.00;

100 lbs. \$26. 100 lb. lots via freight.

AMERICAN LOTUS

The beautiful American Lotus has acorn-like seeds which are eaten by Mallards and other wild ducks.

The flowers of the American Lotus are very beautiful, of a light yellow color often eight inches across. They are hardy and grow in quiet shallow waters where the bottom soil is fairly rich.

Ten pounds will plant one acre.

Delivered Price

\$1.50 per pound; 5 lbs. \$7.00

WHITE WATERLILY

An excellent food and cover plant for fish. White Waterlilies are very ornamental and will beautify the waters.

Delivered Price

\$8.00 per 100 white Waterlily tubers;

\$16.00 per 100 White Waterlily rootstocks;

\$3.00 for 10 White Waterlily rootstocks

THREE SQUARE RUSH

Of about 150 different kinds of rushes, the Three Square Rush is the most important as a wild duck food. It produces a sizeable cluster of meaty seeds which wild ducks are fond of. In sandy soils or firm rich soils that are just moist or shallow waters it grows best. Seeds or roots may be planted now.

Delivered Price

Seed \$1.75 per pound; 5 lbs. \$8.00.

Roots \$39.00 per 1000; 500 @ \$20.00;

100 @ \$5.00

For Brackish Waters, Plant These:

Salicornia

Muskgrass

Sago Pondweed

Widgeon Grass

Three Square Rush

Wild Celery

Wampee Duck Corn Seed

All of these except Wild Celery do well in waters strong of alkaline.

These are the Kinds Most Important to Game Fish:

Wapato Potato

Wild Celery

Muskgrass

Deep Water Potato

White Waterlily

Bulrush

Sago Pondweed

Amer'can Lotus

Wild Rice

The Following are Muskrat Foods:

Wild Millet

Bulrush

Three Square Rush

Wild Rice

White Waterlily

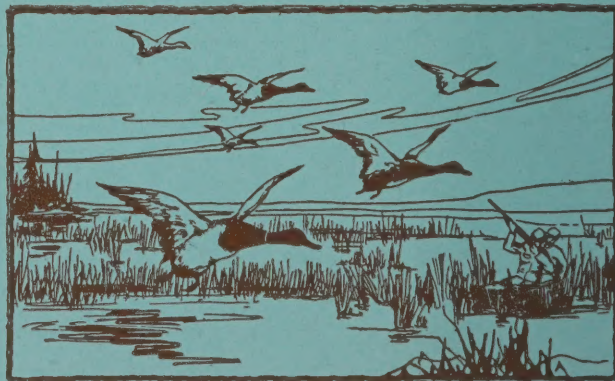

Burreed

Wapato Potato

Deep Water Potato

American Lotus

Sweet Flag

SAGO PONDWEED

GOOD ALL AROUND DUCK FOOD

Early in the season Pondweeds bring Mallards and Teal, later the Canvasbacks and other divers. They are hardy and will grow under almost any water conditions.

The most important food plant of the Pondweed family is the Sago Pondweed, a submerged plant and perennial. When once established in your waters insures a permanent feeding ground.

Pondweeds are very highly recommended as food and cover plants for bass, and other game fish.

Seed of these plants should be planted now in waters from 2 to 8 feet in depth on almost any bottom, either fresh, stagnant, alkali or brackish waters.

Thirty pounds will plant an acre.

Delivered Price

Plants with Seed \$1.40 per Pound;
10 lbs. \$12.00; 30 lbs. \$34.00

MUSKGRASS

RAPID GROWING DUCK FOOD

Widgeon, Gadwalls, Green and Blue Wing Teal, Bufflehead, Ruddy Duck, Mallards, and Bluebills like Muskgrass.

A few bushels of muskgrass planted this Fall will produce a few acres of food for the ducks next Fall.

This plant is also a valuable food and cover plant for fish.

Plants with seed spores can be planted now in either fresh or alkali waters from 2 to 12 feet in depth on almost any bottom. Four bushels will plant an acre.

Delivered Price

Muskgrass with seed spores \$8.00 a bushel.

WAPATO DUCK POTATO

The Wapato Duck Potato is a very good Wild Duck Food. If the waters remain nearly the same level the year around, Mallards and other shallow water ducks will feed upon its tender shoots, tubers and seeds. In places where there is an overflow or the water deepens during fall and winter, Canvasbacks and other divers will feed upon Wapato.

Wapato propagates largely by tubers, planted during fall. Tubers planted this year will produce fully matured plants the following fall.

This plant is very hardy and will grow well in most any inland waters. It does the best in a fairly rich soil on damp lowlands, mud flats or in water from 1 inch to 1 foot in depth.

One thousand tubers plant one acre.

Delivered Price

\$35.00 per 1000 tubers; 500 @ \$18.00;
100 @ \$4.50

DEEP WATER DUCK POTATO

Another favorite food for all kinds of Wild Ducks. The diving ducks feed on it during fall in the deeper waters. Shoal water ducks eat it if the waters are low during fall. It is a rapid grower and produces abundantly of food. It has numerous nut-like tubers on its roots just beneath the bottom soils which the Wild Ducks glut themselves with.

Plant the tubers this fall. A soft mud bottom is best and will produce a luxuriant growth next year. One thousand tubers plants one acre.

Delivered Price

\$35.00 per 1000 tubers; 500 @ \$18.00;
100 @ \$4.50
